

PDi Arm Mounted System

A personal approach to transform the patient experience.

Create an interactive environment centered around the patient with a personal approach to deliver an interactive patient system.

Interact at the bedside.

Arm mounted systems create intimate personal environments where patients feel at ease while viewing personal records, video conferencing with doctors or loved ones, and accessing their social networks and messaging apps.

"...severe headaches made it difficult for my father to wear his glasses, but the TV swing arm allowed him to pull the television close and alleviate his boredom between visits from family and friends."

– Rich C., OH

Reduce back, neck and eye strain.

Allow the patient to easily adjust their viewing experience away from glare and to where it's most comfortable in their current position.

A superior viewing experience.

A smaller screen, doesn't equate to a lacking entertainment experience. A 14" to 19" display mounted in close proximity to the viewer is equal with a 90" wall TV across the room.

Stability and security.

A securely mounted display deters theft and eliminates the risk of a device being damaged by gravity.

3 Arms with Unparalleled Range of Motion

1000 Series Arm

The Longest Reaching Arm in the Industry

**Wires:
Out of sight.
Out of mind.**

Make the patient room a clean, cable free zone. PDi arm mounted systems are engineered to store power cords, ethernet cables, coax and more within the arm for continuous power and connection so the patient won't experience any interruptions.

A broad range of motion.

With just a light touch, PDi's arms lift, swing, tilt, rotate or retract to free up space.

400 Series Arm

**The Durable,
Yet Versatile Arm**

500 Series Arm

The Lean Solution, Without Sacrifices

The most customizable arms in the industry.

PDi's innovative design allows arms to be mounted to headwalls, counters, floors, ceilings, chairs and more.

PDi will even bring their engineering expertise to your project to ensure this system will work in your unique environment.

PDi's patented arm systems are designed to fit PDi's current 19", 15", and 14" display product line and to be backwards compatible with future devices.

Every arm has an antimicrobial powder coated finish for long life. Available in Cream, Black and Grey.

PDi
Communication Systems, Inc.

A Quality Arm Made for Healthcare

The difference is in the details. PDi's arms make the patient's room safer while offering greater durability and enhanced aesthetics. The easy to clean, powdercoated surface is antimicrobial to reduce the spread of pathogens. Many standard arm models are UL Listed, rust resistant with antirecoil and swivel safety features so the arm won't disturb other equipment in the room.
